## **INSTRUCTIONS**

- 1. Please report average wind velocity by knots, mph or **specific** Beaufort Number, not by Beaufort ranges 0-1, 2-3 or 5-9.
- 2. Report elapsed time and corrected times preferably in decimal minutes (2 decimal places; see conversion table at left to conveniently convert seconds to decimal minutes).
- 3. Group all classes sailing the same course under similar winds on a sheet; you may include additional races lower on the page.
- 4. Report each finisher in handicap and level rating fleets, the first boat in one-design classes, and each windsurfer.
- 5. Report classes either by US SAILING class code or, in cases where confusion might exist in class name or in versions of a class, describe the class fully; i.e., sail area, type of boat, keel configuration, etc.
- 6. If available, indicate average number of boats in each class per race, series or regatta.
- 7. Include genoa size (%) when applicable and indicate with letter "S" or "AS" if standard or asymmetrical spinnaker used.
- 8. Please type or print class codes and times legibly. If you submit a copy, please be sure the information is legible.
